

Rethinking What Works: Embedding systems thinking in evaluations of Environment and Climate Crisis

Scott Chaplowe (Senior Evaluation & Strategy Specialist)

Question: *Following your recent study of transformational climate action across the four major climate funds, what key enablers do you identify for evaluation to better support systems change?*

Answer:

1. Break the band-aid habit
2. Engage diverse perspectives
3. Evaluate outside the project box
4. Evaluate throughout the intervention lifecycle
5. Tailor the evaluation framework
6. Avoid the Attribution Trap (follow the contribution path)
7. Adopt a futures lens
8. Embed systems thinking in evaluation capacity development
