# Grounding AI in Evaluation Practice: Lessons from Guinea-Bissau, Nepal, and Georgia

**4 JUNE**  
14:00-15:30  
(ROME TIME/GMT+2)

This panel brings together members of the EvalforEarth Community of Practice to examine how evaluation can remain credible, inclusive, and context-responsive in an AI-augmented world.

Drawing on experience from Nepal, and Georgia, the session offers a cross-contextual reflection on the intersection of policy, practice, and methodology in the use of artificial intelligence for evaluation across food security, agriculture, and rural development.

## Speakers

**Dea Tsartsidze**  
Co-founding partner at  
Solution Alternatives  
International (SAI)

**Ramesh Paudyal**  
Former Member of the  
Provincial Assembly,  
Bagmati Province,

## Moderator

**Hannah den Boer**  
Evaluation Analyst
